5. TRANSACTION

5.1. BACKGROUND AND PURPOSE

Over the last few years, BlueLife has faced financial constraints and increased its level of indebtedness, due to the underperformance of its hospitality cluster and delays in delivering on real estate projects.

In this respect, BlueLife is seeking to strengthen its capital structure whilst also raising funds to finance new property development projects. In parallel, BlueLife will continue its asset disposal program started in August 2019 with the sale of Circle Square. A further MUR288m worth of assets were sold in 2020. Management have targeted MUR238m worth of asset sales over the next 12 months. The sale proceeds will be used to repay bank loans and provide seed funding for cornerstone property development projects.

The restructuring of the capital of BlueLife through the Rights Issue and the Bond Programme is critical for the continuity of its operations. BlueLife will be able to financially sustain its hospitality and real estate segments until the tourism industry in Mauritius recovers from the COVID-19 pandemic, and launch several earmarked property development projects at Azuri Ocean & Golf Village over the next five years namely:

- construction and sale of villas - Golf View Villas;
 - The project will consist of 8 serviced land and 8 villas.
- construction and sale of villas - Ennéa Residences;
 - The project will consist of 12 villas and 18 apartments on the golf course.
- construction and sale of villas - Amara Residences;
 - The project will consist of 26 villas and 16 apartments on the golf course.
- construction of a 9-hole Par 3 golf course with clubhouse and facilities.

The property development at Azuri Ocean & Golf Village is illustrated in the masterplan below:

The Directors are confident that the Rights Issue and the Bond Programme will place BlueLife in a better position to focus on the enhancement of shareholder value by unlocking the potential of its asset base.

Financial year ended 30 June 2020

The financial performance for the financial year ended 30 June 2020 was impacted by the disruption caused by the Covid-19 pandemic with the closure of borders impacting severely the Group's two main segments of business, which are hospitality and property development.

The Group registered operational losses of MUR156.2m for the year ended June 30, 2020 as compared with restated losses of MUR54.8m for last year. Hotels forming part of the Group did not derive revenue since 19th March 2020 and the hotel cluster registered a significant MUR109.5M drop in its turnover and MUR77.1m drop in reported gross profit. BlueLife did not receive any revenue from its property development cluster for the 2019-2020 financial period. The recognition of the revenue from sale of properties to the income statement will only start when the Group breaks ground on construction. In the course of this financial year, the HomeScene building in Circle Square and the 8th floor in Harbour Front Building were sold and the proceeds from the sale have been mainly used to reduce the Group's bank debts and support the Group's working capital needs.

As a consequence of this current crisis on BlueLife's business, BlueLife has carried out impairment tests. At Group's level, provision for bad debts and expected credit losses, mainly for the hotel cluster, are reflected under the item 'Administration Expenses' and explain the upsurge in 2019-2020. The Group results were also impacted by the fair value decrease of investment properties for MUR 10.8m to which shall be added MUR32m from discontinued activities.

The reduction in the net asset value of BlueLife's subsidiaries forced BlueLife to make provision for bad debts and expected credit losses under the item 'Administration Expenses' and impairment of MUR119.6m in the value of its investment in subsidiaries.

Financial costs of MUR88M have been incurred for the year ended June 30, 2020. With the prevailing difficult conditions in 2019-2020, BlueLife has not been able to reduce its financial costs as initially anticipated. The Group continues its efforts towards the sale of non-core assets aiming to continuously lower the Group's indebtedness and the financial costs' burden even further.

All the above contributed to losses for the Group of MUR274.2m for the year ended June 30, 2020 as compared to MUR211.5m restated for last financial year.

At year end, the Group's total assets and net assets stood at MUR3.70bn and MUR1.83bn respectively (2019 restated: MUR4.05bn and MUR2.11bn). Net assets per share was MUR2.88 as at June 30, 2020 as compared with MUR3.30 as at June 30, 2019.

Eight months ended 28 February 2021

The eight-month period ended 28 February 2021 continued to reflect the severe impact of the Covid-19 outbreak on the Group results with a significant drop in its revenue and gross profit and reached MUR119.7m and MUR55.9m respectively. Its hospitality cluster was the main contributor to the Group losses although there was strong focus on collection of debtors, which led to the partial reversal of provision for bad debts accounted at the end of the last audited year. The Group has continued the cost curtailing endeavours that were put in place since last year.

Finance costs decreased compared to last financial year, resulting from the reduction in borrowings and a fall in the prevailing interest rates.

At 28 February 2021, the Group total assets and net assets stood at MUR3.56Bn and MUR1.75Bn respectively (June 2020: MUR3.70Bn and MUR1.85Bn). As a result of the change in net assets, net assets per share stands at MUR2.68.

9.2. TRADING PROSPECTS FOR THE YEAR ENDING 30 JUNE 2021

The dramatic spread of the COVID-19 pandemic continues to disrupt lives, livelihoods and businesses. It is not easy to anticipate the date at which hotels forming part of the Group will be able to welcome tourists at levels they were achieving before the outbreak. On the property cluster's side, BlueLife continues to address a number of leads received but buyers need to be able to travel free and visit before engaging into the purchase of a property in Mauritius. Management is working hard towards safeguarding our assets and businesses but the financial year to come will remain a challenge in terms of revenue and profits.

BlueLife will continue to favour cash generation with the sale of non-core assets and will focus on the implementation of property development projects. The sale of Circle Square is nearly completed, and BlueLife continues its effort to sell assets earmarked for sale which management hopes to conclude during the course of this financial year.

The construction of the golf estate and its residential components is planned to start in the course of this financial year and the Group's results will be positively impacted with the profit on disposal of inventory for sale on a percentage completion basis.

BlueLife has also applied for a Smart City Certificate for its Azuri estate development.

The Directors approved a budgeted circa. MUR7,000,000 representing professional fees in respect of a master planning exercise for the earmarked property development and the Smart City Certificate application.

9.3. DIVIDEND POLICY

The Company does not have any predetermined dividend policy and the dividend payout is subject to the financial performance of the Company.

The Company did not declare any dividends for the year under review and during the previous three years.

The current risk in respect of residential sales is on the high side since we are in an off-plan sales phase. All built units have been sold and the high risk is attributable to the need of reaching sales levels which allow the launching of the various Azuri residential components. At this stage, we rely largely on the ability of design and concepts to be attractive, the right range and pricing of products as well as performing sales team and channels. Property is amongst the hardest hit sector as a significant portion of our clientele is not able to travel and conclude their buying in Mauritius. This could further delay our PDS type products. We are working on increasing our product offerings to the local market.

<p>Pandemic Diseases - Natural catastrophes</p> <p>Epidemics, viral outbreaks and natural catastrophes could have an adverse effect on our business, financial condition and results of operations. The outbreak of the virus disrupted supply chains, closed hotels and resulted in quarantines across the globe. In Mauritius the country's borders remained closed for tourist's arrivals from 16 March to 1 October 2020 resulting in the total absence of tourists. Since re-opening with a forced 15 days quarantine, tourists do not yet rush at our borders. Tourism was one of the first sectors to be deeply impacted by the pandemic, the sector also risks being among one of the last to recover, with the ongoing travel restrictions and the looming global recession. The outlook for recovery is extraordinarily uncertain, as the coronavirus (COVID-19) pandemic continues to heavily hit the sector.

Risks Relating to Earnings/Profits in respect of the potential events or conditions that result in the failure to meet revenue objectives, to generate cash flows to support operating, investing and financing needs of the organisation

Risk description	Trigger event / indicator	Present Risk Rating	Control process to mitigate risk
Budget and cash flow forecasts The budget should provide an accurate forecast of anticipated revenues and a roadmap for appropriate spending. Budgets in cyclical industries lead to difficulties in establishing revenue targets while expenses must be as precise as possible to ensure that cash needs are fulfilled	<ul style="list-style-type: none"> • Variances between Budget and Actual figures • Unpredictable recovery for the tourism sector renders the budgeting for our hotel segment relatively complex and uncertain • Inability of buyers to visit Mauritius and confirm their buying decision of residential units may cause further delay to the construction programmes, reducing revenue and profits 	HIGH	<ul style="list-style-type: none"> • Efficient budget control procedures to ensure monthly monitoring of realised vs budget as well as rolling budgets and business plans • Close monitoring of budgets and focus on room pricing for our hospitality segment and costs savings • Local sales team more dynamic towards yield management • Operating and financial costs control and savings strategies implemented
Low inventory and low market offering of residential projects Low inventory and lack of residential projects lead to the reduced funds to ensure funding of working capital as well as no contribution to Group Results (profit on development in 2016 & 2017 had been on the high side with drop in 2018 and barely no revenue in 2019)	<ul style="list-style-type: none"> • Low inventory of completed projects • Long lead time in bringing residential projects to market 	HIGH	<ul style="list-style-type: none"> • Reduce lead time to develop new projects without compromising on milestones procedures to ensure that risks are contained • Ensure full adequacy to market demand • Optimise phasing of projects to promote flexibility in product adjustments/customisation as well as possibility of launching construction of individual project components. • Construction of demo unit to test design and quality as well as tool to promote sales
Exchange Rate Risk The value of foreign sales can decline due to exchange rate fluctuations. Attempt to forecast the likely impact of the pandemic on the earnings of our hotel segment is a rather complex exercise. Distribution or otherwise) equally with or in priority to, or in subordination to the existing Shares without any requirement that the Shares be first offered to existing Shareholders.

REPORT OF THE INDEPENDENT AUDITOR ON THE SUMMARY FINANCIAL STATEMENTS

TO THE MEMBERS OF BLUELIFE LIMITED

Opinion

The summary financial statements, which comprise the summary statement of financial position as at 30 June 2020, the summary statement of profit or loss, summary statement of comprehensive income, summary statement of changes in equity and summary statements of cash flow for the year then ended, are derived from the audited financial statements of BlueLife Limited (the "Company") and its subsidiaries (altogether, the "Group") for the year then ended.

In our opinion, the accompanying summary financial statements are consistent, in all material respects, with the audited financial statements, on the basis described in the basis of preparation note.

Summary Financial Statements

The summary financial statements do not contain all the disclosures required by International Financial Reporting Framework. Reading the summary financial statements and the auditor's report thereon, therefore, is not a substitute for reading the audited financial statements and the auditor's report thereon. The summary financial statements and audited financial statements do not reflect the effect of events that occurred subsequent to the date of our audit report on the audited financial statements.

The Audited Financial Statements and Our Report Thereon

We expressed an unmodified audit opinion on the audited financial statements for the year ended 30 June 2020 in our report dated 29 October 2020. This report also includes:

- A Material Uncertainty Related to Going Concern section that draws attention to Note 3 in the financial statements. Note 3 indicates that the Group and the Company incurred a loss of Rs. 274,159,638 and Rs. 195,879,892 respectively for the year ended 30 June 2020 and as at that date, their current liabilities exceeded their current assets by Rs. 737,426,740 and Rs. 91,428,649 respectively. As stated in Note 3 of these financial statements, these conditions along with liquidity challenges in conjunction with, and exacerbated by external factors in the economic environment in which the Company operates as a result of COVID-19 pandemic impacting the entity's core business of marketing, building and selling developments, indicate the existence of a material uncertainty which may cast doubt on the entity's ability to continue as a going concern. These matters are however not addressed in the summary financial statements and would require the reader to refer to the full financial statements for that year for additional information.
- The communication of other key audit matters.

The audited financial statements and the summary financial statements do not reflect the effects of events that occurred subsequent to the date of our report on the audited financial statements.

The financial statements and thus the summary financial statements for the year ended 30 June 2020 includes corresponding numbers for two earlier periods and some of these numbers were restated in the 30 June 2020 financial statements. The corresponding numbers were audited by BDO Ltd and they expressed an unmodified audit opinion on these financial statements in their reports dated 30 September 2019 and 21 September 2018 respectively.

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared in all material respects with the basis of accounting described under the basis of preparation note.

We draw attention to basis of preparation note to the interim financial information, which describes the basis of accounting. Going Concern

We draw attention to Note 16.2 in the financial summary, which indicates that the Group and the Company incurred a loss of Rs. 111,710,989 and Rs. 69,429,251 respectively for the period ended 28 February 2021 and as at that date, their current liabilities exceeded their current assets by Rs 465,555,993 and Rs. 148,448,734 respectively. As stated in Note 16.2 of this financial summary, these conditions along with liquidity challenges in conjunction with and exacerbated by external factors in the economic environment in which the company operates as a result of the COVID pandemic impacting the entity's core business of marketing, building and selling developments indicate the existence of a material uncertainty which may cast significant doubt on the entity's ability to continue as a going concern.

Further, in accordance with the requirements of the Securities (Public Offer) Rules 2007, no comparative information have been provided in the statements of profit or loss and other comprehensive income and statements of cash flows. The interim financial information is presented in Mauritian Rupees ("Rs").

16.2. GOING CONCERN NOTE

The Group and the Company incurred net losses of Rs. 111,710,989 and Rs. 69,429,251 respectively for the period ended 28 February 2021 and has a net current liability position of Rs. 465,555,993 and Rs. 148,448,734 respectively as at 28 February 2021.

The Company is the holding company of multiple subsidiaries, all based in Mauritius, that comprise the BlueLife group (the "Group"). The Group's principal activity is that of property development and the continued viability of this activity is predicated on the development and sale of investment properties, utilising development scheme initiatives made available to the private sector by the government. The key risks and dependencies of this activity are therefore the continued sale of properties to either foreign investors or on the local market. The Group has a considerable quantity of lots available, at varying stages of development, which has the potential to generate significant revenues and profit over the next 10-15 years.

As the branding and selling of investment properties are dependent on the physical presence of prospective investors in Mauritius, the advent of the COVID-19 pandemic has placed considerable pressure on the Group's ability to realise sales in the short term, and given the current trend, it is believed that this pressure will continue until 2023. Additional risks, exacerbated by the global pandemic, include downward pressure on property prices as the supply of properties under special schemes in Mauritius outweighs the current demand. Management believes that the Group brand offering provides the Group with an edge over its competitors. Current property developments forecast over the next three years will also realise sufficient cash flows to allow the Group to incur strategic capital expenditure, which is considered key in creating value to sell a particular part of their future property development, however this is dependent on the re-opening of the borders. Cash flows should also be sufficient to partially cover continued overheads of the group but there are other initiatives which will be required to meet the liquidity needs to the entity operationally and to meet the obligations of the group which will materialise over the current and next year. The Group had initially forecasted for receipts from the sale of villas, but this has been delayed due to the continued impacts of COVID and the second lockdown in Mauritius and resulted in the Group having to manage its expenditure on development. Thus, the Group had to use the available bank facilities to finance its operations. This rights issue and other funding initiatives currently being examined by management will reduce the dependence on the bank facilities. Inflows from the sale of villas are expected in as from early FY22.

A secondary source of revenue of the Group is in the Hotel Operations sector. The Group currently operates two hotels, one of which is located at the heart of the property development that is Azuri. The hotels have been particularly impacted by the global COVID-19 pandemic, and until the borders re-open, they will continue to make losses. It is noted that the hotels have associated themselves, through a hotel management agreement, with a leading global hotel brand name. This strategy has resulted in the hotels being able to take advantage of the leading hotel global customer network and, through significantly improved occupancy rates, the hotels have reflected improved financial results, up until the outbreak of COVID-19, indicating their ability to meet their obligations without further assistance or support from their shareholders or financial institutions. It is expected that this situation will bounce back rapidly once the border re-opens and tourism returns to normal levels.

The hotels are indebted with various banking institutions and the Company has provided corporate guarantees against these loans. Management has availed themselves of all possible forms of assistance in order to mitigate the risks associated with the loan liabilities, including: agreed loan moratoriums with the banks, wage assistance schemes available from the government, various austerity measures to keep costs to a minimum during the crisis, and the possibility of availing themselves of a government-devised economic stress relief fund.

Management considers that at least one of the hotels is strategically important to their core investment property strategy, as the integrated resort scheme village which has been created needs to offer a holistic service and facility offering to residents and tourists alike. Revenues therefore generated by hotel operations, whilst important in value annually, are not considered as core to the group's strategy. Management has resolved to dispose one of the hotels considered not to be strategically important and has already received a promising offer which is being finalised.

Other segmental sources of income to the Group are derived from commercial sales or rentals and from facilities and maintenance revenue from existing residents of the village. Amounts generated from these sources, whilst contributing to profitability, are not considered significant to the overall business of the Group.

Management has also undertaken to and is in the process of, as part of their strategy, disposing of non-core activities of the Group. Many of these disposals are advanced with a higher probability of cash flow whilst others still require offers to be received. For some properties, the sale has already been completed where the funds have been used to repay some debts of the Group. Management has been actively managing the cash flows relating to property development matching the timing of development expenditure with expected

inflows from sales whilst recognising that some development must continue in order to attract inflows/investors. The largest shareholder has also provided a letter of support to the extent of its shareholder's loan of Rs 200 million plus accrued interest thereon. Management has also secured extensions on some facilities and continues to engage with financiers as the events relating to COVID continue to play out. In addition, management is considering other initiatives and possible capital raising measures to support the entity up to FY 2023 and in discharging the arising obligations relating to the hotels as discussed above. Management is working towards a right issue of Rs 300 million, where two shareholders, namely IBL Ltd ("IBL") and Actis Paradise Jersey Limited ("Actis"), representing 70.05% of the share capital of the Company, have confirmed to the Board their intention to subscribe to the Rights Issue at the level of their respective shareholders' loans in the Company and realise a further net cash inflow depending on the amount subscribed by the other shareholders in the context of this right issue. All the necessary approvals have been obtained for this rights issue and the process, as per the Listing Rules in Mauritius, is currently underway.

Further to the above, management is investigating other funding sources that will enable them to accelerate the development of properties and manage their liquidity more effectively which, to date, is being managed through new and available bank facilities. Management believes that the existing facilities available are sufficient but alternative funding is required to maintain the prime strategy of the Group, which is property development.

Whilst management is confident that the various initiatives taken to mitigate the risk of a liquidity squeeze on the Group will be sufficient, these initiatives depend on a number of external factors, including finding willing buyers for some non-core assets, final market approvals for other board approved initiatives over and above the rights issue and in terms of receiving funding from customers, the re-opening of borders and the extent and duration of the global pandemic in investor-targeted countries.

The above conditions indicate the existence of a material uncertainty which may cast significant doubt around the Company's ability to continue as a going concern and, therefore it may be unable to realise its assets and discharge its liabilities in the normal course of business. The Company and certain subsidiaries therefore continue to rely on the continuing support of its shareholders and on the measures noted above.
